

Line Marking Solutions

Durable Technology Made for Safer Roads

LINE MARKING

Line Marking Solutions

Wattyl has a long history of providing durable, high visibility line marking solutions across Australasia.

Products are developed and tested locally to ensure they meet the requirements of local authorities and are suitable for use across a variety of substrates and applications methods.

Formulations are designed to provide high opacity, excellent durability, efficient transfer rates, excellent wear resistance and fast dry times ensuring speed and efficiency for the applicator but also many years of service for the asset owner.

Applications include:

- Roadmarking for highways, city streets, car parks, speed humps, disable parking marking, pedestrian crossings
- Airfields including runways, taxi-ing strips, aprons, hangar markings
- Safety marking for pedestrian walk ways, exclusion zones, shopping centres, warehouses and factories

CENTRELINE SOLVENT-BASED

Quick-Drying, Durable, Solvent-Borne Line Marking

Centreline is a modified alkyd with hard wearing characteristics designed to for high speed line application, providing sharp well defined line edges. Features include excellent durability and wear resistance. It is suitable for use on roads, parking lots, factory floors and high traffic areas.

The product is suitable for use with or without glass beads (for added visibility) and is available in white, yellow, red and black.

AIRPAVE WATER-BASED

Self-Cleaning Water-Based Line Marking

Airpave was developed with self-cleaning characteristics specifically for marking airport runways, taxiways, parking bays and aprons.

Features include its ability to erode at a controlled rate ensuring that the film is self-cleaning and stays bright, providing maximum visibility at all times and prevents build up of the line on subsequent applications.

Health and safety features include low VOC (<15g/l) and non-flammable properties.

Airpave is available in high opacity white, yellow and black formulations and approved to CASA standards.

RAPIDLINE WATER-BASED

High Performance Water-Based Acrylic Line Marking

The Rapidline provides high visibility, outstanding service life with excellent wear and adhesion properties. Features includes high flexibility and excellent adhesion to both the road surface and to glass beads. The addition of glass beads at the time of application further increases line visibility by providing retroreflectivity.

Rapidline is fast-drying ensuring fast finishing, minimal down time. Health and safety benefits include low VOC (less than 10g/l VOC), low odour and is non-flammable.

White and yellow formulations are approved to APAS 0041/5 and conform to AS 4049.3.

A black formulation is also available for blacking out redundant lines or to further increase the line contrast in critical locations.

WATTYL PROTECTIVE COATINGS

Wattyl Protective Coatings is a leading paint and coatings manufacturer in the Australasian region, specializing in high performance protective and marine coating solutions across a vast range of market segments, namely infrastructure, water and waste, oil and gas, mining and power. Wattyl's innovative, quality products meet the challenges associated with the harsh extremes of the local environment. Products are designed to provide optimum performance, improve efficiency and reduce operating costs. Our portfolio of prominent brands include Epiname!® epoxies, Galvit® zincs, SeaPro® marine coatings, and Poly U™ and Paracryl® high performance finishes.
