Intermediate: Epinamel<sup>®</sup> DTM985

Topcoat: Poly U<sup>™</sup>775 MIO Bridge Grey

**ISO/ ASNZS2312 ENVIRONMENT:** C5-M

**PROJECT OWNER:** RMS

**APPLICATOR:** McElligott Partners

The Bunnerungee twin bridges are one of four bridge projects with Roads and Maritime Services (RMS), to use Wattyl as the preferred coatings solution in recent years. Measuring at 224m in length, maintenance of the two-lane structural steel bridge proved to be challenge due to its isolated location in rural NSW. Prior to the paint application, the \$3m project required structural concrete reinforcement for the bridge abutments.

Applicators McElligott Partners' performed well to the client's stringent quality requirements, as well as extreme weather conditions and time restrictions due to the water release from Mindi Lakes. Despite the challenges, Wattyl's coatings system performed well and will provide Bunnerungee Bridge an extended life expectancy for many years to come.
